

Country Action Plans/Strategic Planning

Dr. Faith Mwangi-Powell
Executive Director
African Palliative Care Association

Strategic / action plan

- determines
 - Where an you are going over a given period of time
 - How you going to get there? Cost, TA etc
 - How will you know you got there or not
-

Two levels of thought

Immediate

- How you will use information provided from this meeting
- How you will communicate the information to other stakeholders in your country and who the stakeholders are
- How you will continue to collaborate with the people who are here with you.

Short-long term

Benefits of an action plan/strategic plan

- Defines the purpose of the team
 - Establishes realistic goals & objectives consistent with the aim of the team within a time and the team's capacity to implement
 - Communicates the goals and objectives to stakeholders
 - Maximizes resources and helps to focus on priorities
 - Provides a benchmark for measuring progress and a mechanism for informed change when needed
-

How to do a strategic plan

- Normally starts with developing a overall problem definition and creating a broad statement of intent around the problem.- Vision/ mission

 - Identifying the right team and agree the goals you want to achieve within period of time (short- / long term?)
-

Who to involve

- Involve other stakeholders from your country.
 - Through an awareness workshop
 - Feedback session
-

The model/what we would like you to do today

- Using the Strategy planning document
 - Discuss and agree 3-5 key priority problems in your country as identified in the SAC and BOAT

 - Under each problem discuss:
 - What?-(Is the problem)
 - Why?-(Is the reason)
 - What? (are the objectives-Specific Measurable, Achievable, Realistic, Time bound- SMART)
-

Model contd'

- How? (Will you solve the problem- action plan)

 - Who?- who is responsible. Who is the best person to do this?

 - When? How long will this take

 - How Much will it cost

 - How will you now- you solved the problem see SMART
-

Thanks

□ The end!
